Turn Your Flow Process into Reality

Microinnova transforms your continuous flow process from lab scale into small and/or bulk manufacturing scale.

Engineering Experience

Our experts will provide you with all essential information at each step of your project:

- Assessment of already existing plants to evaluate room of improvement by means of (partly) adaption to flow
- Conceptual and basic engineering for economic estimation
- Detailed planning and documentation for profound decisions
- Turnkey plants or equipment parts

Finally, you will receive valuable informations about equipment and documentation. We are considering all your requirements regarding safety, usability, economic and ecological aspects as well as guidelines like GMP or ATEX.
